

Groundsman Flexblade Soil / Core Collectors

The **Flexblade Core Collector** is a patented implement developed by Groundsman Industries to simply and efficiently remove aeration soil from the green. This implement will save many hours of manual work or an extra operation with heavy cumbersome equipment. It collects cleanly and when used as an AERATOR attachment, over 60% of the cores enter the collector without touching the ground. The remainder are scooped cleanly from the surface without blocking the holes by a series of platelets which conform to the contours acting like shovels. Surface disruption is minimised and the greens are left clean ready for top dressing and play.

For Groundsman Aerators

For Turf Tractors

For Other Aerators

For Turf Utility Vehicles, Bunker Rakes, etc

The Flexblade follows contours with precision for a cleaner scoop. For more information see contact details below.

Flexblade Soil / Core Collectors Technical Information

Overall Dimensions

	FCCTM7C / FCC8 / FCCTP648	FCCTM9C / FCC12
Width	155cm (61")	200cm (78")
Length	100cm (39")	100cm (39")
Height	76cm (30")	76cm(30")
Weight	89kg (196lbs)	109kg (240lbs)
Swath	140cm (55")	175cm (69")

	FCCTM7C / FCC8 / FCCTP648	FCCTM9C / FCC12
Collection System	7 Plates	9 Plates
Max Groundspeed MPH	9.32	9.32
Max Groundspeed KPH	15	15
Avg Coverage m²/min	200	267
Avg Coverage sq.yds/min	233	287

Caster Wheels	Two pneumatic 500 x 6 rib thread tyres with roller bearing hubs
